What is climate change?

Climate change is the long-term warming of the Earth caused mainly by human activities. It leads to rising temperatures, melting ice, extreme weather, and threats to life itself.

CHALLENGE WEEK

The new session started with games, activities and crafts devised to help students adapt, cooperate and grow together. The trailblazers of grade 3 perfectly completed their task for challenge week; creating spectacular indoor games using recycled items. Teamwork and their artistic ability helped their amazing notions come to fruition. Students of grade 5 reused plastic bottles by planting plants in them, which reduced waste and helped the climate. This project also contributed to Frobel's goal of saving the climate from global warming.

AWARD CEREMONY

On the 14th of August, Frobel Academy celebrated the achievements of their students in the year 2024-2025. The basketball court was full of anticipated and eager faces of pupils, waiting for the moment their names would be called. Parents, filling the rows of empty chairs, were also invited to cheer on their children for their amazing accomplishments. The students were presented with many awards including the Honors Award, High Achievers Award, Perfect Attendance Award and a few others for community services and participation. With flashes of cameras and rounds of applause, this event came to a ceremonious end.

On July 27 2025, Frobels Academy conducted the Teachers' Induction, where all teachers of Frobels reunited after a long summer vacation to discuss plans for the long-awaited upcoming year. In this program, the curriculum plans and event plans were explained to the teachers, but that's not all. Fun games and thrilling icebreaking activities were prepared for them, which was a truly enjoyable experience for everyone. The Climate Change theme for the new session was also introduced, a project that will be focusing on doing our part on preventing the adverse effects of climate change in the world. One of the ways it is done is by reducing use of electricity at our campus. Frobels looks forward to an exciting upcoming year and a healthier, greener environment.

Teachers' Induction

Parents' Orientation

In the beginning of August, Frobels held the Parents' Orientation for parents of grades 1-10. On this event, the school culture, rules and regulations and processes were explained to them in detail. For KS-3, teachers of this year were also introduced, along with our new career counselor, Ms. Masooma, who will be supporting our students in choosing their subjects and overall careers. Frobels offered subjects for KS-3 and club activities were also discussed in this meeting. The books and stationeries for the new session were distributed on this day.

uni-fair

The Uni Fair took place on 23rd August, 2025 at Frobel Academy. This event took place from 10:00 AM to 3:00 PM. This occasion was designed to help those who had passed high school and were looking for options to study abroad. Seven of the best universities in Bangladesh and thirteen expert education consultants gathered under one roof to give specialist advice on admissions and scholarships. Students met different university delegates and discovered programs that matched their passion. This helped them plan their dream future path with confidence.

CRAZY HAIR DAY

Frobel has once again celebrated their annual Crazy Hair Day. On this event, our youngsters from KS-1 let out their imaginations and appeared at school with their hair messed up in the craziest ways ever! From dyed hair to weird ponytails, our students really brought out their inner creativity and youthful spirit through their unique hairstyles. This was a fun and thrilling experience for all of us and we look forward to organize more events like these.

On the 4th of September, Frobel Academy celebrated their first ever batch who sat for the O levels examination after the results came out. Our students of Key stage 1 made crowns for their seniors Congrats Grade 10!

O-LEVEL CELEBRATION

Riddle Break 1:
How can you drop a raw egg from a height onto a concrete floor without cracking it?

TEACHERS' DAY

On 5th of October, Frobel Academy celebrated Teachers' Day in honor of all our hardworking teachers. The teachers were gifted with well-deserved compliments from their students and a piece of chocolate. On this day, we organized wonderful cultural performances from teachers and students. This program highlighted a teacher's importance and influence in a student's life. We are and will always be grateful for all our teachers here at Frobel.

ANIMALS' DAY

World Animal Day is on October 4th. The next day, on 5th, Frobel too celebrated this event here at our campus where KS-1 had a fashion show dressed up as animals. Students brought their beloved pets to school for everyone to meet and play with! This program showed how much we love animals and care for them. This day was a truly enjoyable experience for everyone.

FUTSAL TOURNAMENT

Frobel had hosted a Futsal tournament where our young players had got to participate in and have a wonderful time in! Our students had truly enjoyed being included in this event.

CHAMPIONS ONCE AGAIN!

Our girls at Frobel Academy shined bright in the CGS Inter School Basketball Tournament held between 21 st to 23 rd September. They defeated the best teams in Chittagong to win the tournament. In April this year, our girls stood as champions and brought honor to our school through their exceptional skill and teamwork. Fly high, girls!

Riddle Break 2:
What is at the end
of the rainbow?

Our school held its annual Student Council Elections, with enthusiastic participation from both students and teachers.

Classes had their polling booths to cast their votes in an organized and truly democratic process.

After an exciting race, the winning candidates were elected and proudly shared their pledges, which include improving and fostering a friendlier and more inclusive school environment. We congratulate all participants and look forward to the positive changes our new council will bring

Riddle Break
Which Letter of the alphabet has the most water?

MC TRAINING

A group of our teachers from Frobel Academy recently participated in Marshall Cavendish training, an enriching experience designed to enhance professional expertise. Through this training, our teachers strengthened their confidence and refined their event-hosting skills. They learned practical strategies for engaging audiences, communicating with clarity, and facilitating school events with greater effectiveness. This meaningful professional development opportunity will not only support their individual growth but also contribute positively to the learning community at Frobel Academy.

MA O SHISHU

The teachers of Frobel Academy were very lucky to have a three-day training session with Ms. Masarrat Tavawalla and Ms. Arwa Batiwalla from Sunderji's Global Academia. The first step to fostering children's behavior is to accredit teachers. The recent professional development workshop, "Managing Behaviors" with Ms. Masarrat and Ms. Arwa was very transformative. Teachers learned more about the sensory world. Many hands-on activities were done: priming, visual cue cards, and sensory circuits. The teachers, both mainstream and special educators, walked away inspired, enlightened, and ready to have a new take on teaching. They learned that stronger teaching tools lead to more responsive classrooms and happier students. A special visit was arranged by Ma O Shishu hospital where the Sunderji team held a seminar to share their expertise with the Autism and Neurodiversity department.

Riddle Break 4:

**What invention lets you
look right through a wall?**

Coffee with HOS

The HOS of Frobel met with the parents of KS 1-3 over a productive session of coffee—both on campus and via Zoom. The air was buzzing with optimism and meaningful insights over coffee! Their presence and active participation is what makes the Frobel Academy community so special. Together, we are not just building stronger connection—we are shaping brighter futures for our children.

**Riddle Break 5:
What color is
the wind?**

Frobel Academy

DER Debate Participation

Our students, Mukarrama and Adyan proudly represented the school at the interschool competition at CIDER. With confidence and well-crafted arguments, students showcased excellent speaking skills and teamwork. Their participation reflected hard work, discipline, and a passion for critical thinking. We congratulate all participants for making our school proud!

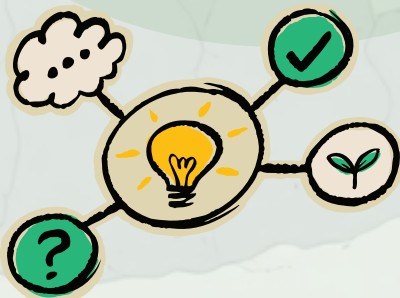

Teachers' Training

Frobel always believes in upgrading their teachers by providing them with world-class trainings. This year in July, we had Renissance from India to educate our teachers on Universal Design for Learning (UDL) to improve our teachers' teaching skills and bring them at par with the rest of the world. New and advanced scaffolding teaching methods were shared with our teachers.

Riddle Break 6:
What has hands
but cannot clap?

Parents' Corner

CHIKUNGUNYA

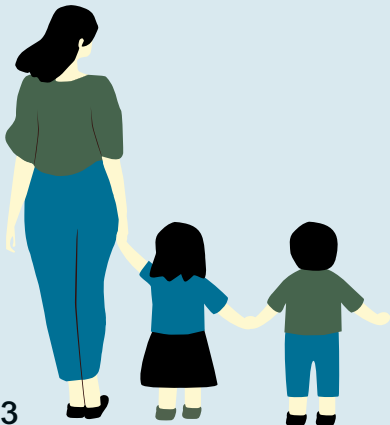

Many families in Bangladesh have been affected by the mosquito-borne viral disease Chikungunya, especially during the monsoon seasons. It is transmitted by *Aedes aegypti* and *Aedes albopictus* mosquitoes—the same vectors that spread dengue. Common symptoms include fatigue, headache, rash, intense polyarthralgia, and sudden high fever. Joint pain may persist for weeks or months, affecting daily activities and school attendance, though the illness is rarely life-threatening.

Because there is no specific antiviral therapy or vaccine, prevention is essential. Eliminating stagnant water around homes and schools helps reduce mosquito breeding. Additional protection includes full-sleeved clothing, window screens, bed nets, and repellents. Cleaning flower pots, buckets, and containers weekly can greatly lower breeding sites. Supportive care includes rest, hydration, and paracetamol for fever and pain. Aspirin and other analgesics should be avoided unless prescribed by a clinician. Early medical consultation ensures better symptom management.

With coordinated efforts, communities, schools, and parents can limit Chikungunya transmission and protect children from this preventable disease.
